

partition:Partition

next:Partition

card:Card

```
graph TD; card[card:Card] -- red --> partition[partition:Partition]; card -- green --> next[next:Partition];
```

The diagram illustrates a data structure where a central node, 'card:Card', is connected to two other nodes. A red line connects the bottom-left corner of the 'card:Card' box to the bottom-left corner of the 'partition:Partition' box. A green line connects the bottom-right corner of the 'card:Card' box to the bottom-left corner of the 'next:Partition' box.
